

Secure Doc PAPER

-Secure Doc Paper is manufactured with HOML's new Hidden Message Technology.

The world's only Safety/ Security Paper that is effective with today's digital copiers and desktop scanners.

“VOID” or “UNAUTHORIZED COPY” messages appear on materials printed on SecureDoc paper when they are copied or scanned on a B&W Copier, Color Copier or Desktop Scanner.

Custom hidden messages or images are available.

SecureDoc Paper tint also thwarts forgery by revealing white areas if erased.

An inexpensive handheld plastic verifier lens reveals hidden words or images to authenticate documents printed on SecureDoc paper.

Dssi Secure Doc paper is available in wide choice of popular paper types, sizes, single- or double-sided, micro-perforated, in 3 stock colors, up to 28" x 40".
