

STEEL FILES AND RASPS

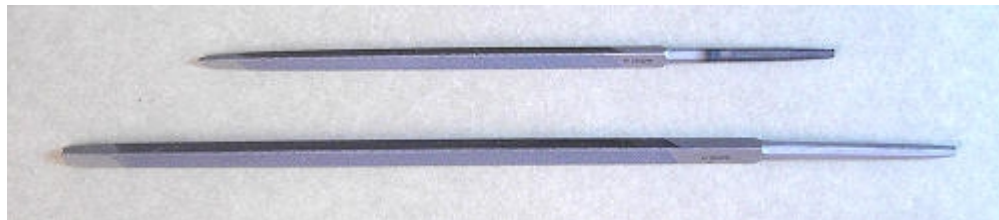

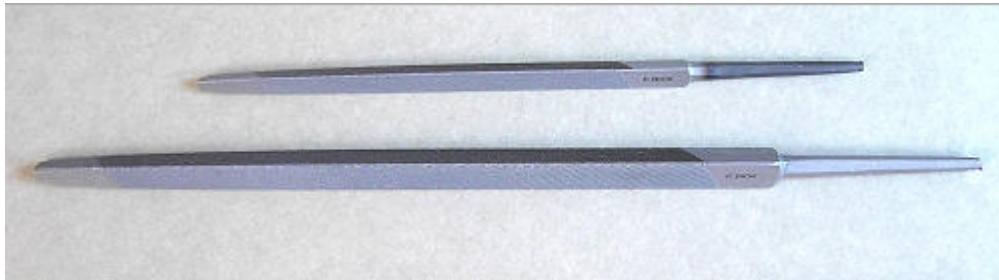

Flat Files for Trimming Irregular Teeth

Regular Saw Files

Slim Saw Files

JPT is producing high quality Engineers Steel Files and Rasps.

File is one of the oldest and simplest, yet most useful hand tool for metal finishing, when it is applied with pressure against the surface of metal, it removes small bits of metal.

Product Range:

Saw Files:

Types: Regular Tapers, Slim Tapers, Extra Slim Tapers, Ultra Slim Tapers

Applications: Used for sharpening wood working saws and similar thin edges such as chaff cutter, blade matchets.

Rasp Files:

Types: Hand Wood Rasps, Half Round Wood Rasps, Round Wood Rasps

Applications: Basically used in wood cutting industries for forming various arcs

Mill Files:

Types: MSGG (Mill Saw both sides square edge), MSGR (Mill Saw one end square edge, another side round edge), MSRR (Mill Saw both sides round edge), Mill Taper (Mill Saw Taper Files), MSRU (Mill RUK both sides round uncut edge), Farmers' Own.

Applications: These type of files are used for sharpening of agricultural tools

Machinist Files:

Types: Hand, Flat, Three Square, Square, Half Round Parallel, Half Round Pointed, Round.

Applications: These files are used in general workshops and machine shops. These are available in various cross sections like Round, Half Round, Square, 3 Square, Flat and Hand. The selection of the cross section depends upon the required rate of material removal and the cross sections from which the material is to be removed.
